

Project Design Phase-II

Data Flow Diagram & User Stories

Date	04 November 2022
Team ID	PNT2022TMID20879
Project Name	Statistical Machine Learning Approaches To Liver Disease Prediction.
Maximum Marks	4 Marks

Data Flow Diagrams: A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, and password, and confirming my password.	I can access my account/ dashboard	High	Sprint-1
	Login	USN-2	As a user, I can log into the application by entering my email & password	I can access my account/ dashboard	Medium	Sprint-1
	Dashboard	USN-3	In our dashboard, it will display about the symptoms of the liver disease	Users can know the details about the liver disease	Medium	Sprint-2
	Liver prediction page	USN-4	The user should enter the details of the parameter	Details of the parameter	Medium	Sprint-2
Customer (web user)	Upload Images	USN-5	As a user, I can upload the image that is required for finding whether liver disease is there are not.	Can get results based on the information provided.	Medium	Sprint-3
	Enter data	USN- 6	As a user, I can enter the required data from the scanned report.	Can get based on the information provided.	High	Sprint-3
	Report	USN-7	As a user,I can generate the report in PDF format.	The result can be generated in PDF format in the user login.	Low	Sprint-4
Administrator	Analyze	USN-8	As an admin, I will analyze the given data.	I can analyze the given data.	High	Sprint-2
